SKILLS

- Python
- ETL/ELT automation
- SQL Server
- Azure SQL
- Hadoop
- Power BI
- Agile methodologies (Scrum)
- Git
- APIs

EDUCATION

- **Bachelor's in Systems Engineering**
Universidad Mariano Gálvez
2018-2023
- **Master's in Cybersecurity**
Universidad Mariano Gálvez
2024-2025

ABOUT ME

Data Engineer with 2+ years of experience designing, maintaining, and supporting data pipelines and analytics workflows for reporting, operations, and decision-making. Strong background in ETL, Python automation, advanced SQL, with hands-on experience integrating APIs, validating large datasets, and optimizing performance.

Comfortable working in agile, cross-functional environments, collaborating with BI, analytics, and operations teams. Experienced in batch and near-real-time data processing, with a solid conceptual foundation in data lakes, data warehousing, and distributed processing.

WORK EXPERIENCE

• DATA ANALYST

Flowing Rivers(Claro)

2023-2024

- Creating SQL queries for process and job monitoring using the Hadoop tool.
- Analyzing failures and early error detection in data flows.

• DEVELOPER BACKEND ETL'S

Atento

2024-Present

- Design and development of data pipelines using Python, SQL, and Pentaho.
- Orchestration of ETL workflows with daily, hourly, and near-real-time execution.
- Integration of data from APIs, web applications, and databases.
- Optimization of complex SQL queries, reducing execution times by up to 85%.
- Implementation of data validation, deduplication, and quality control.
- Support for BI teams with reliable and documented datasets.
- Administration and monitoring of Azure SQL in production environments.
- Technical documentation of workflows, business rules, and dependencies.
